Are you ready for real-time asset visibility?

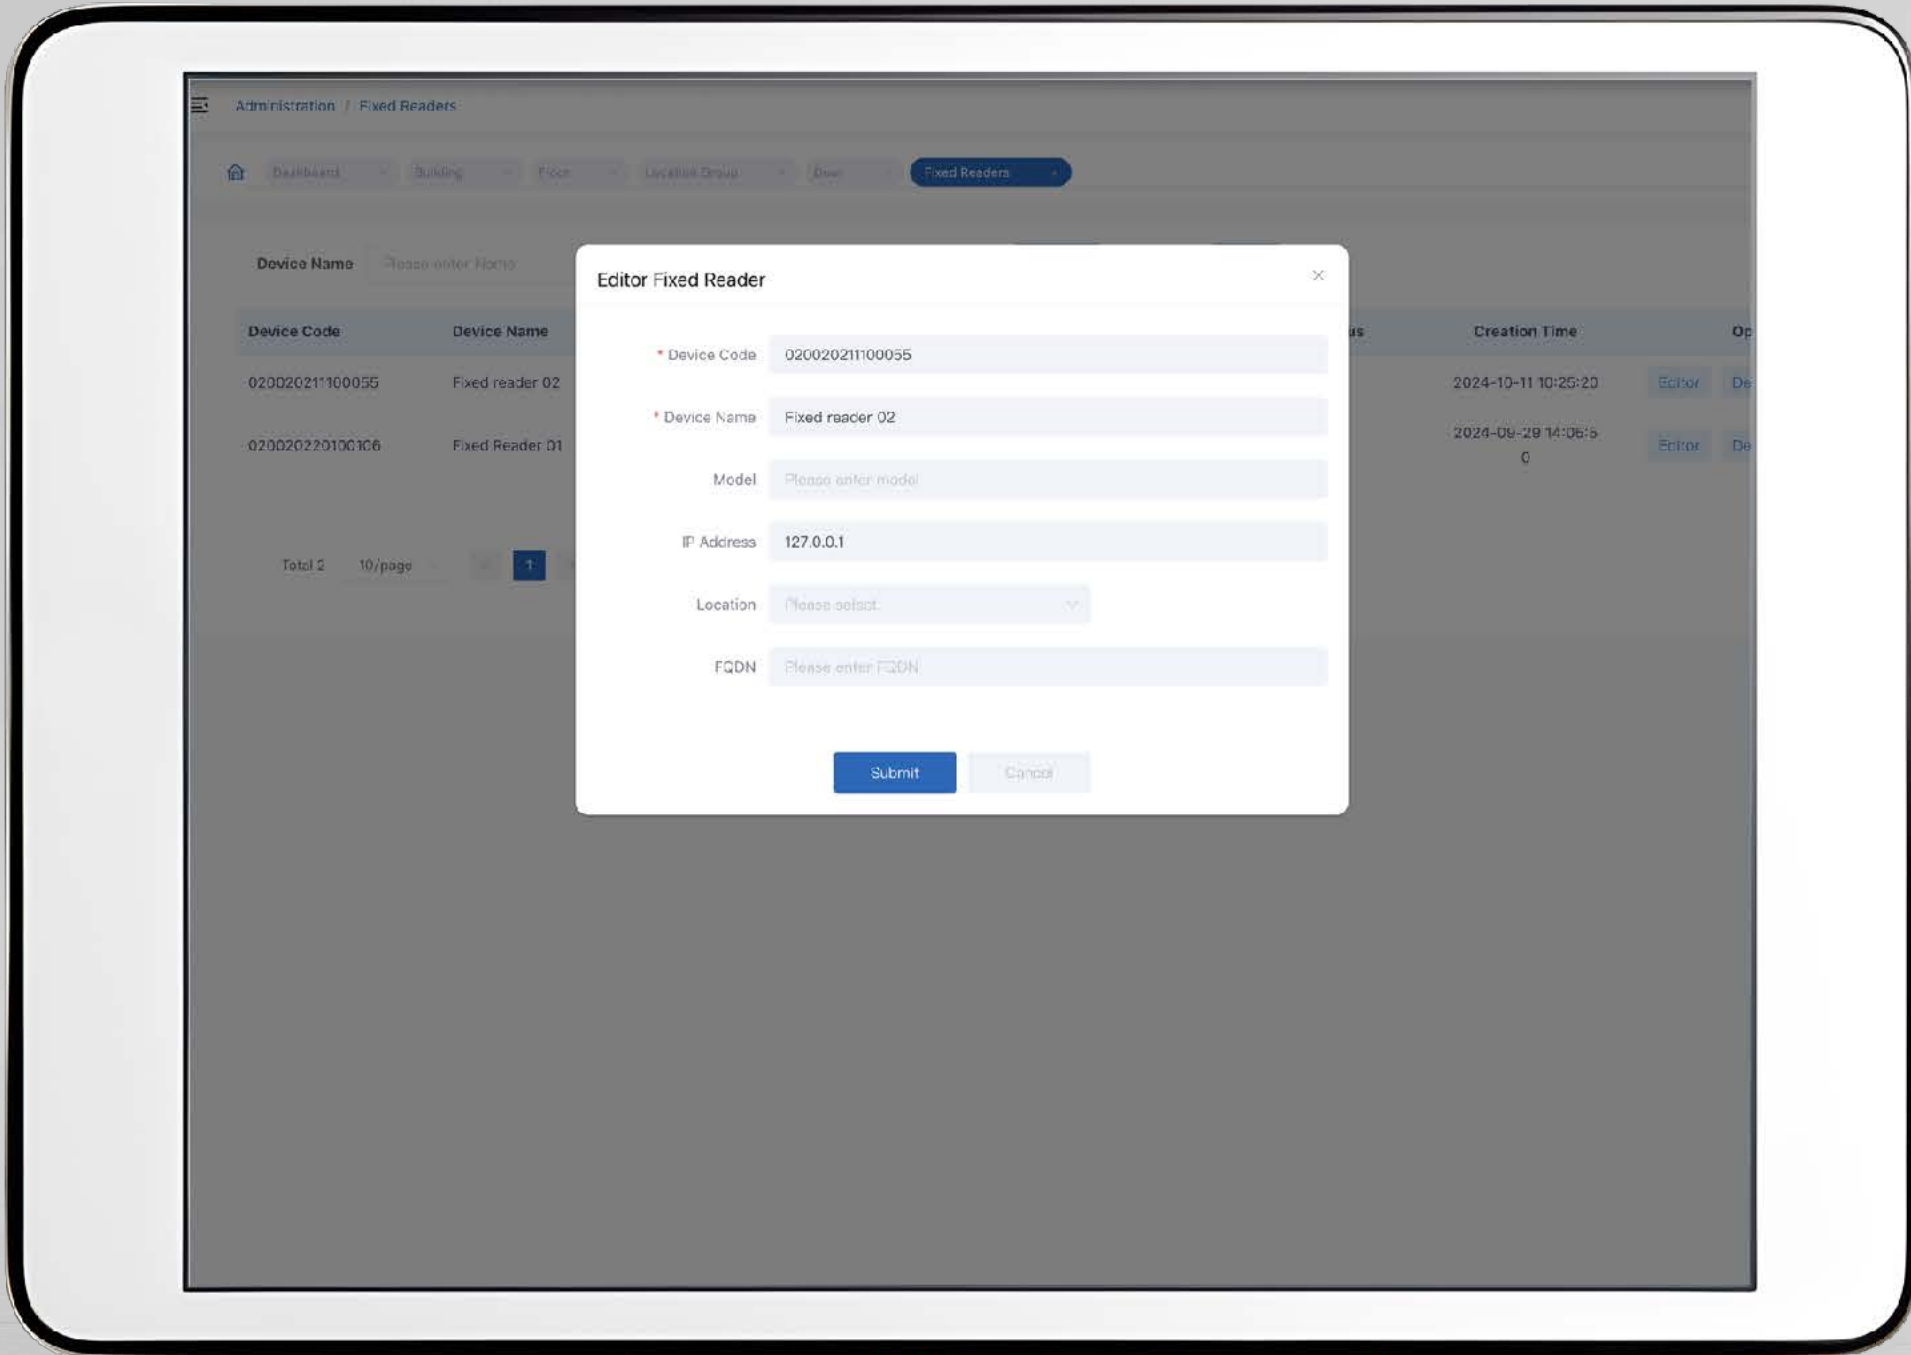

SANRAY RFID Cloud Asset Tracking System is a fully integrated asset solution that utilizes RFID technology to track and monitor assets.

Viewed from anywhere in the world with just a browser, you are presented with a user-friendly dashboard designed to give you up-to-the-minute status of your assets **anytime, anywhere.**

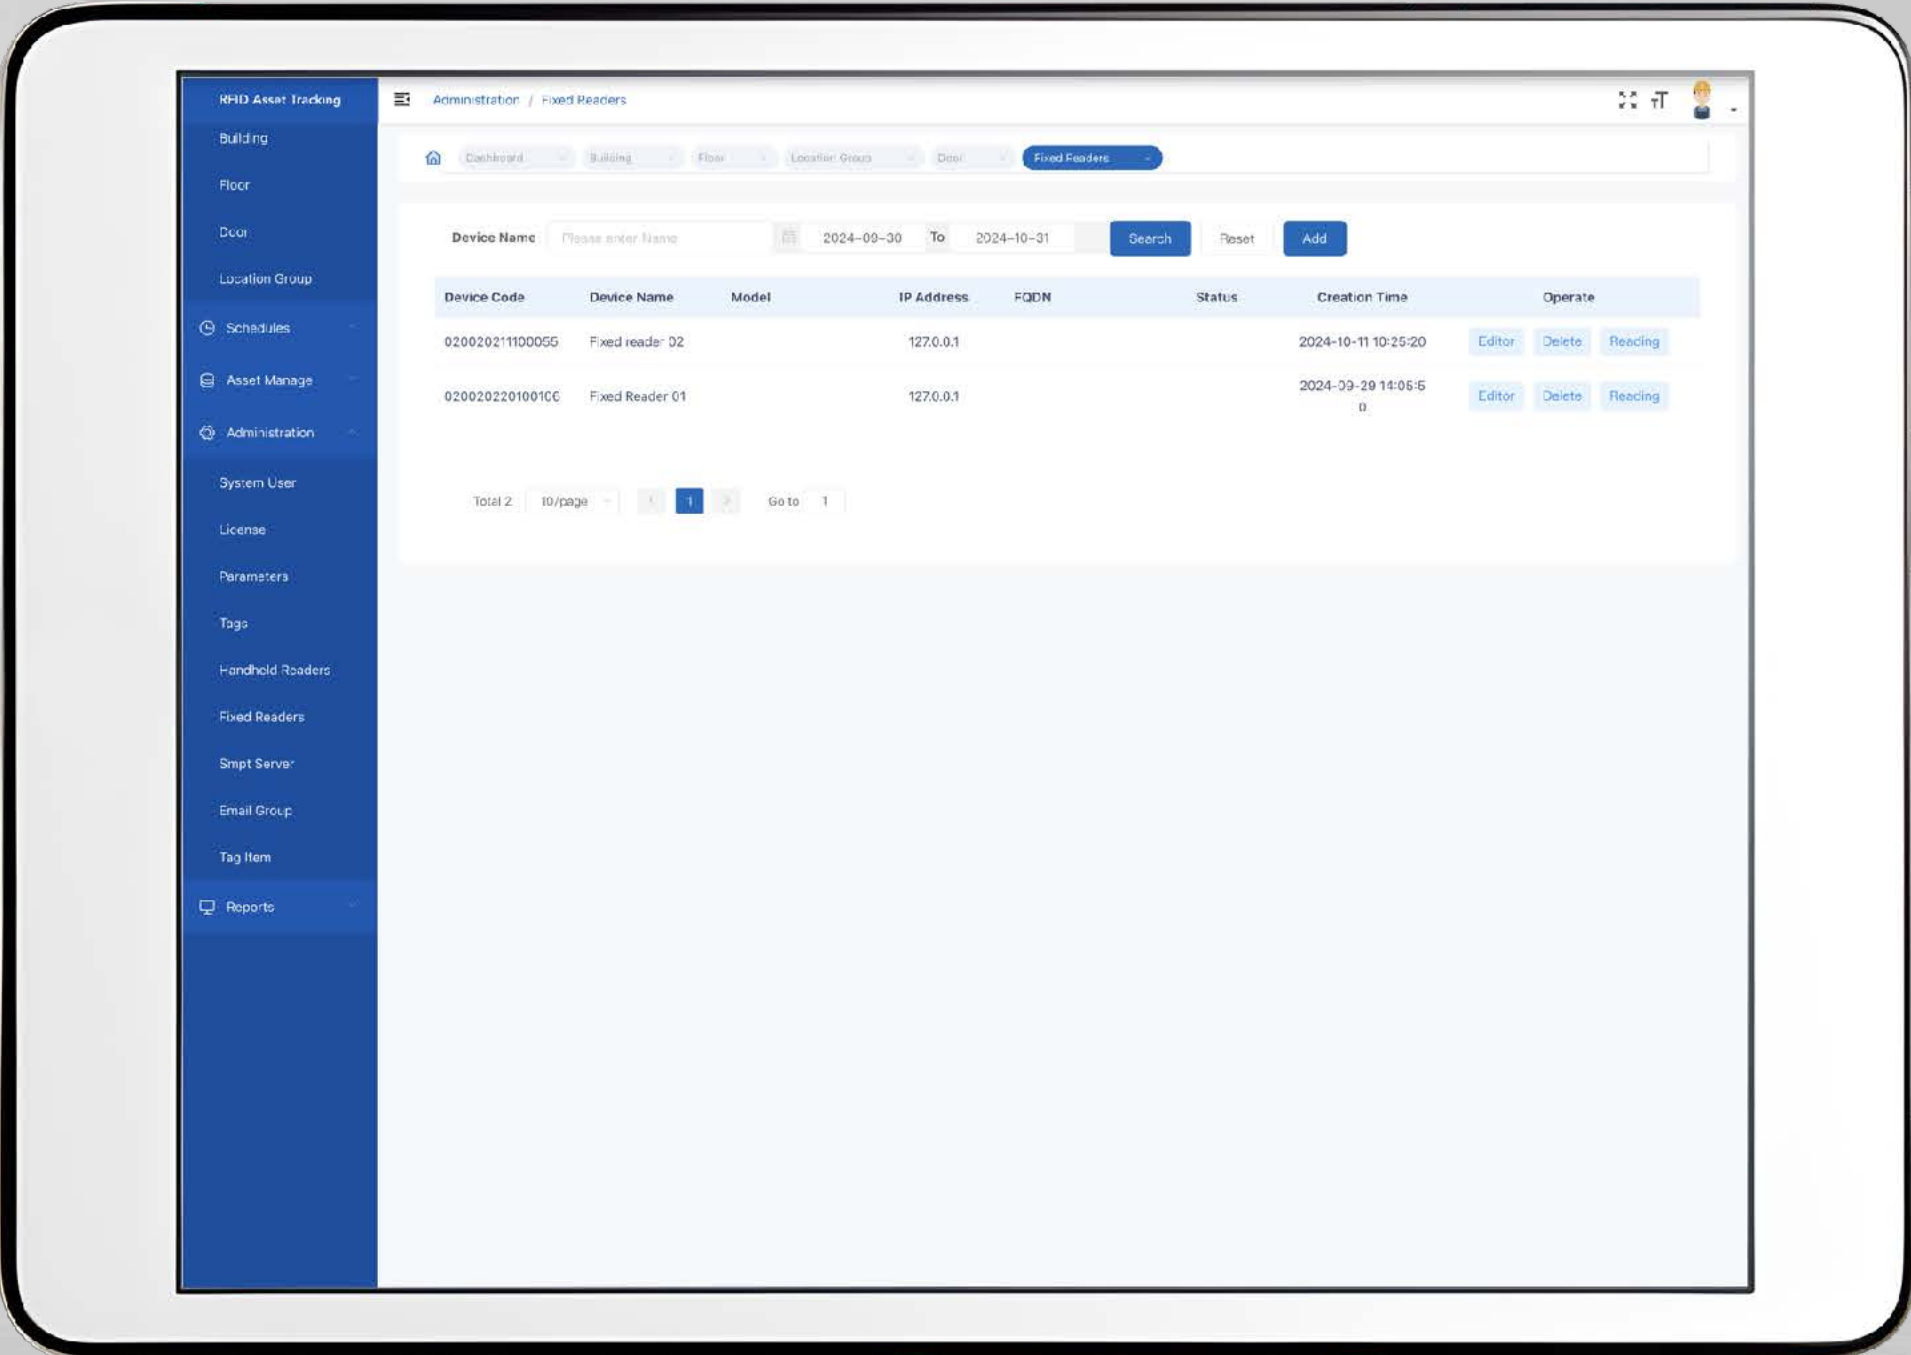

Install and configure **RFID READERS**

The intuitive user interface allows you to quickly add RFID readers to the system and assign them to installed locations.

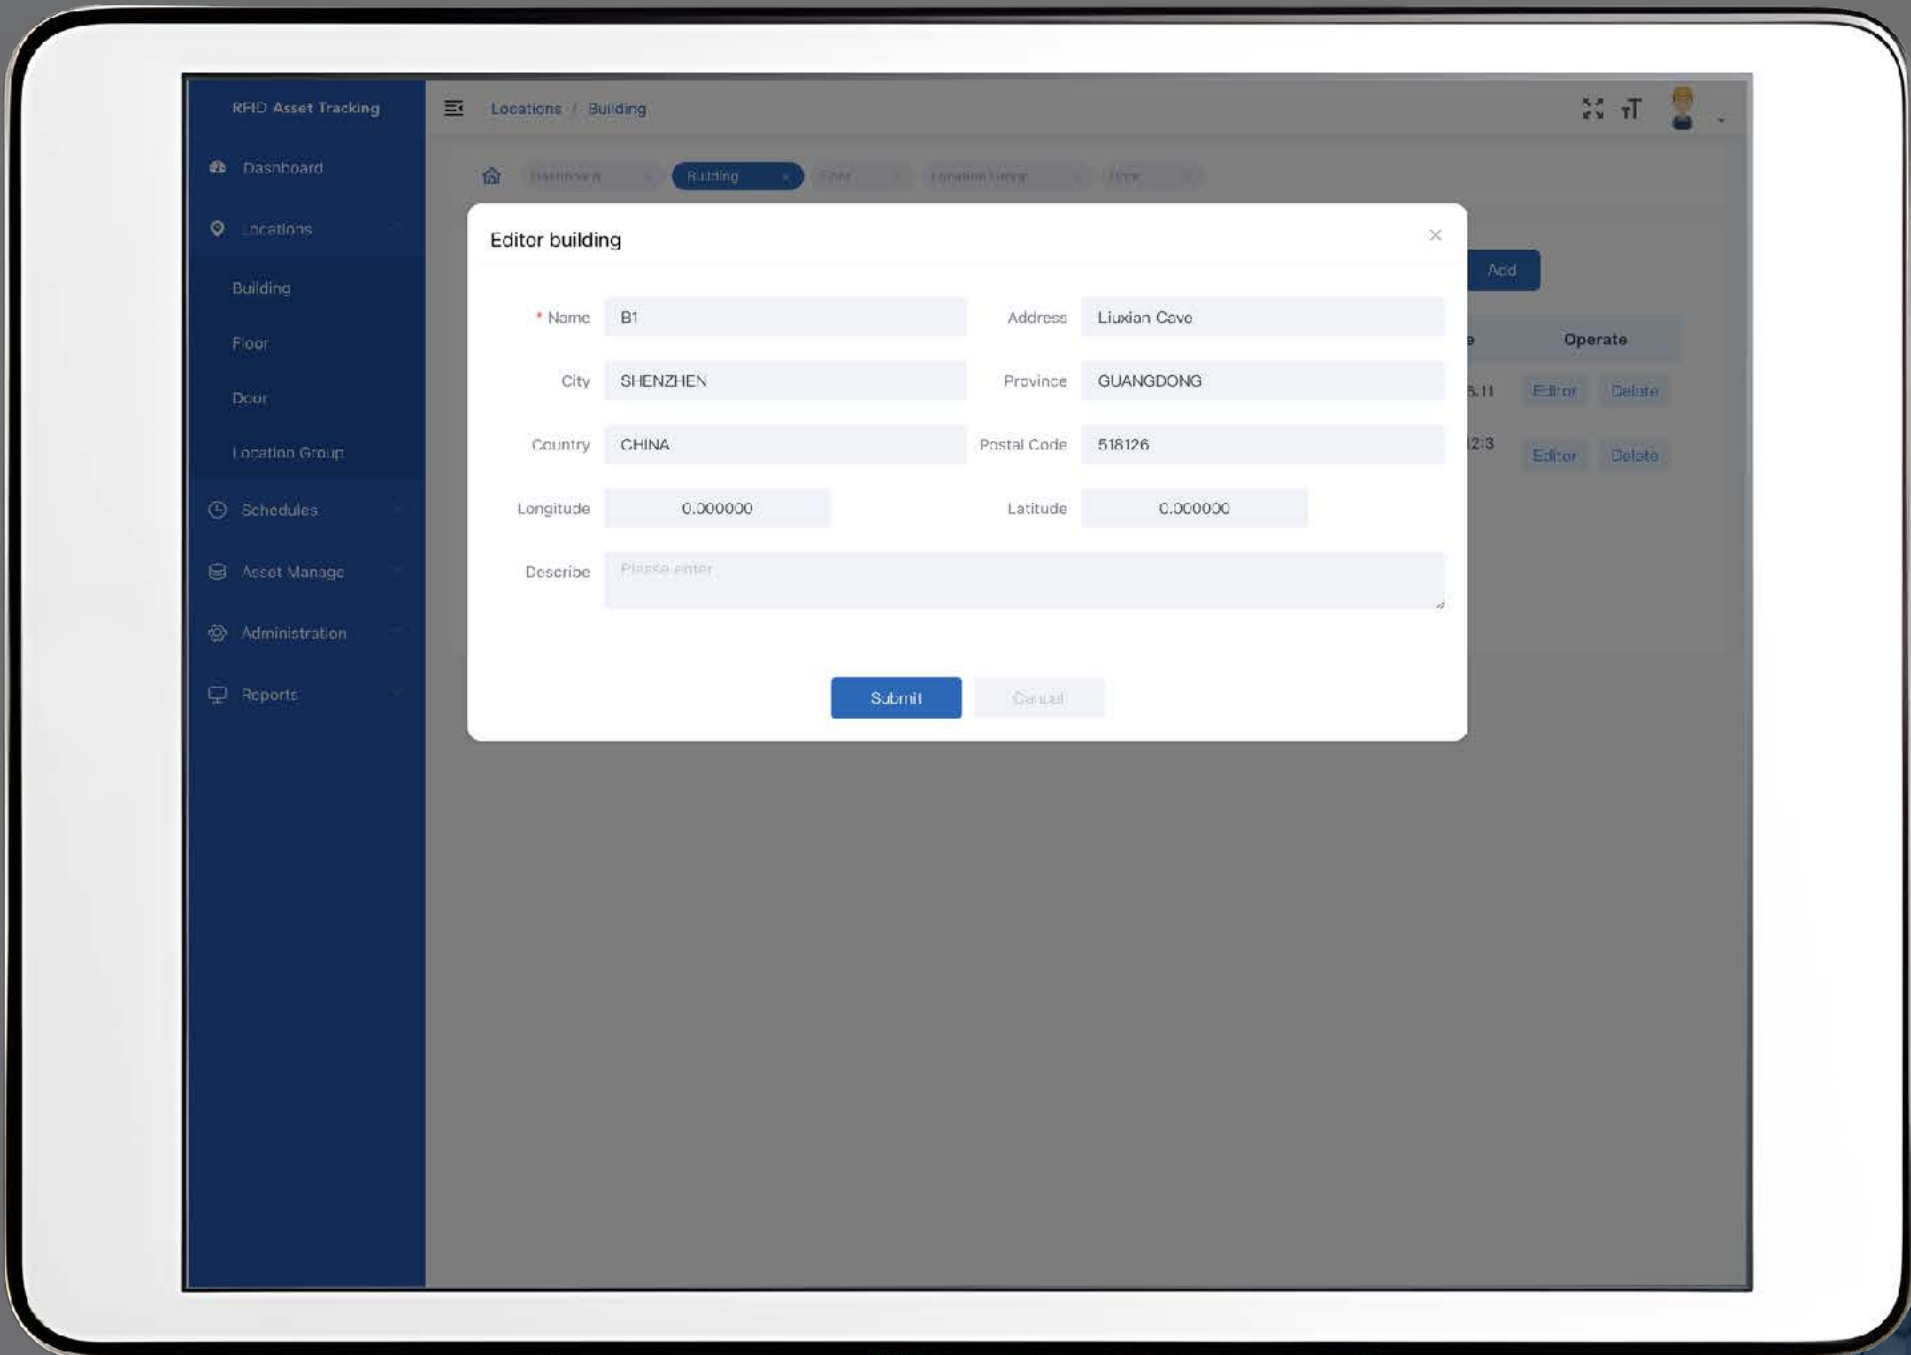

Installation and binding of RFID readers

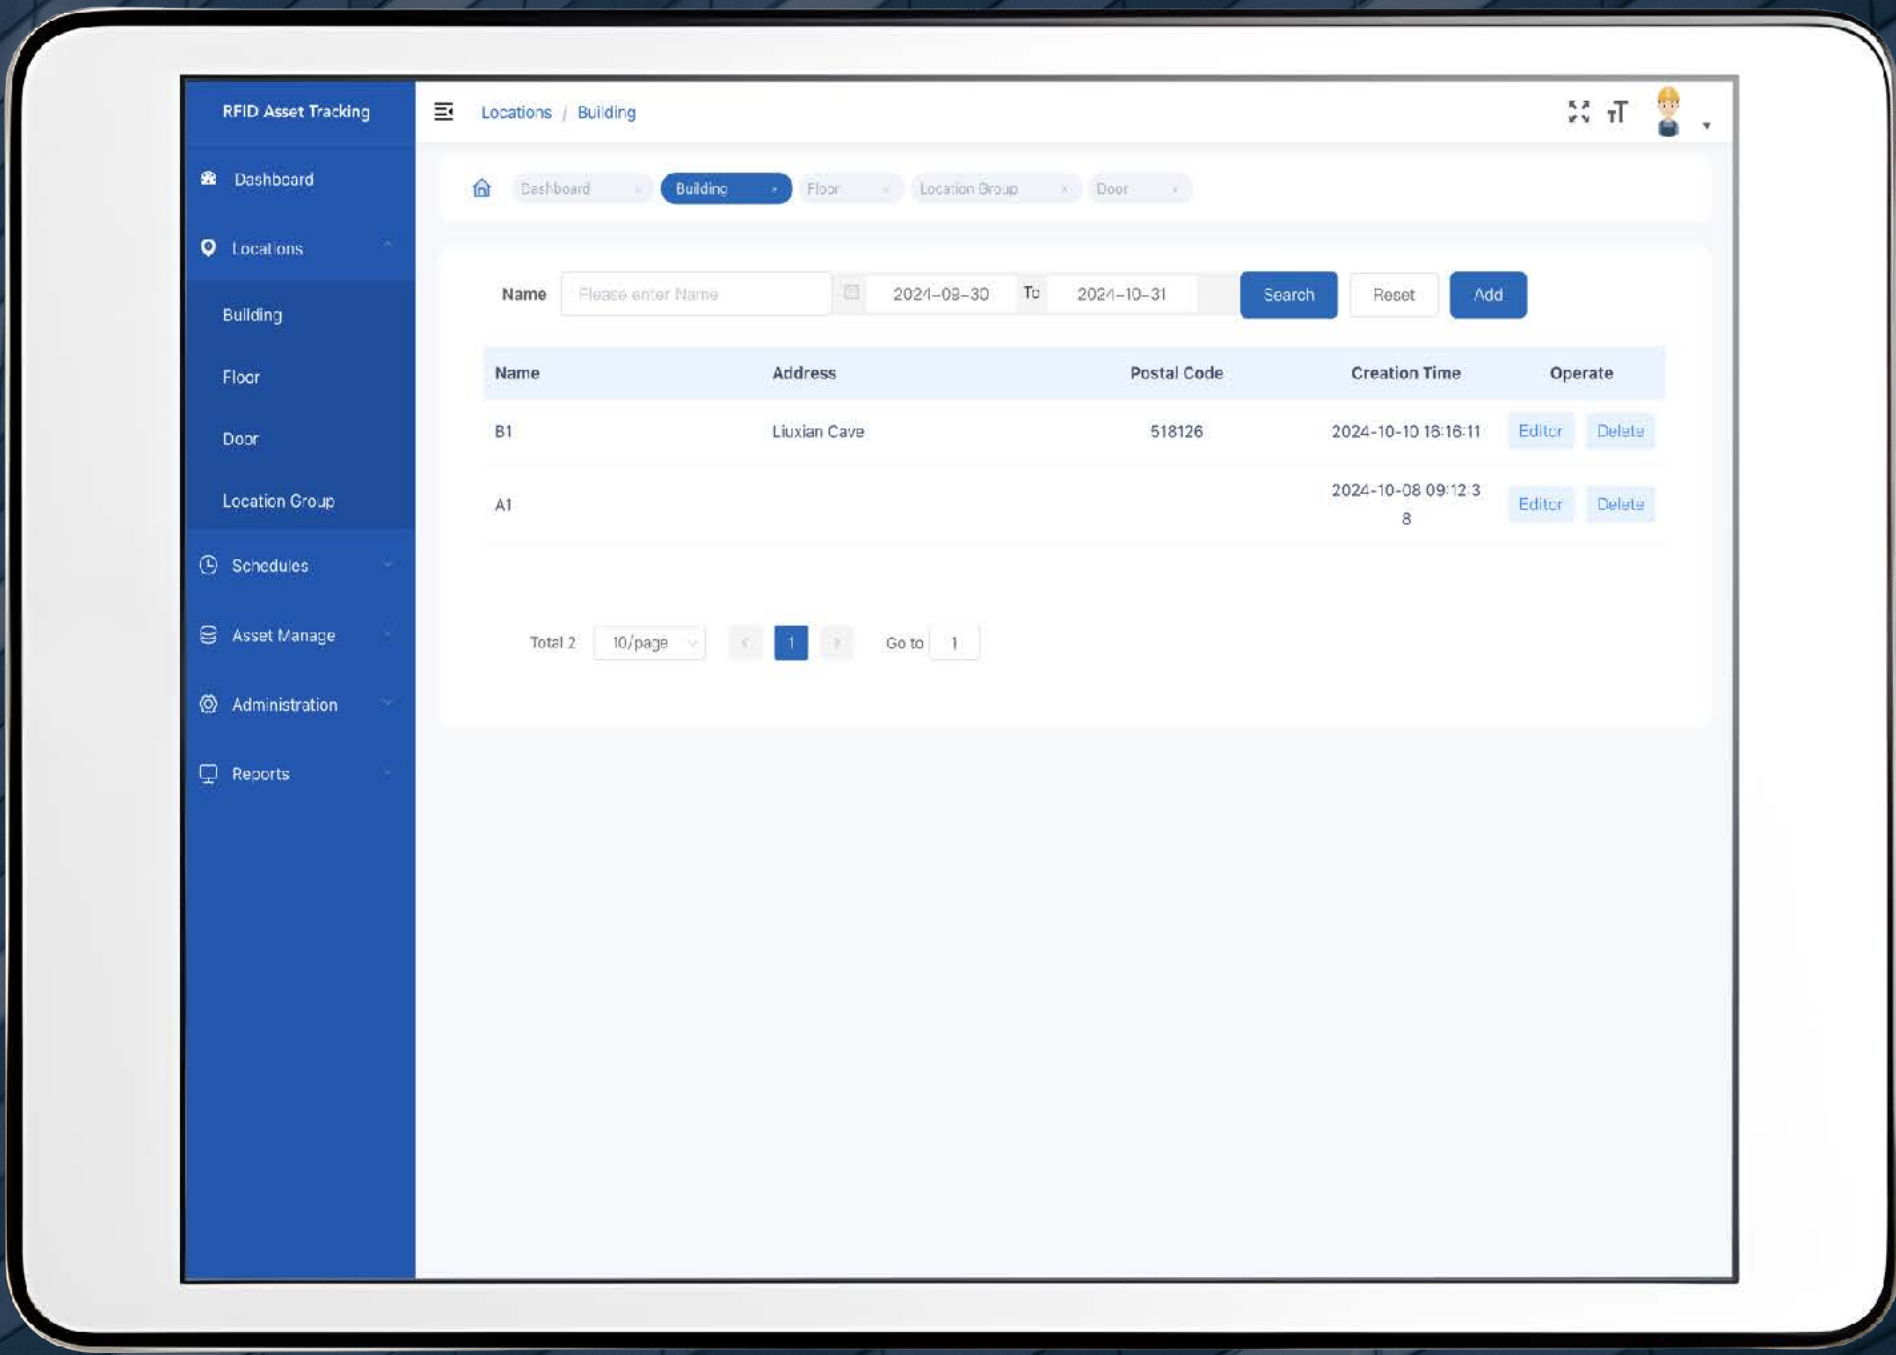

Assign readers to each area for visual tracking

Setting Up Asset Tracking **Locations**

SANRAY RFID Cloud Asset Tracking System is a fully integrated asset tracking system. Easily set up working asset zones, allowing you to track assets as you move them from one or more locations.

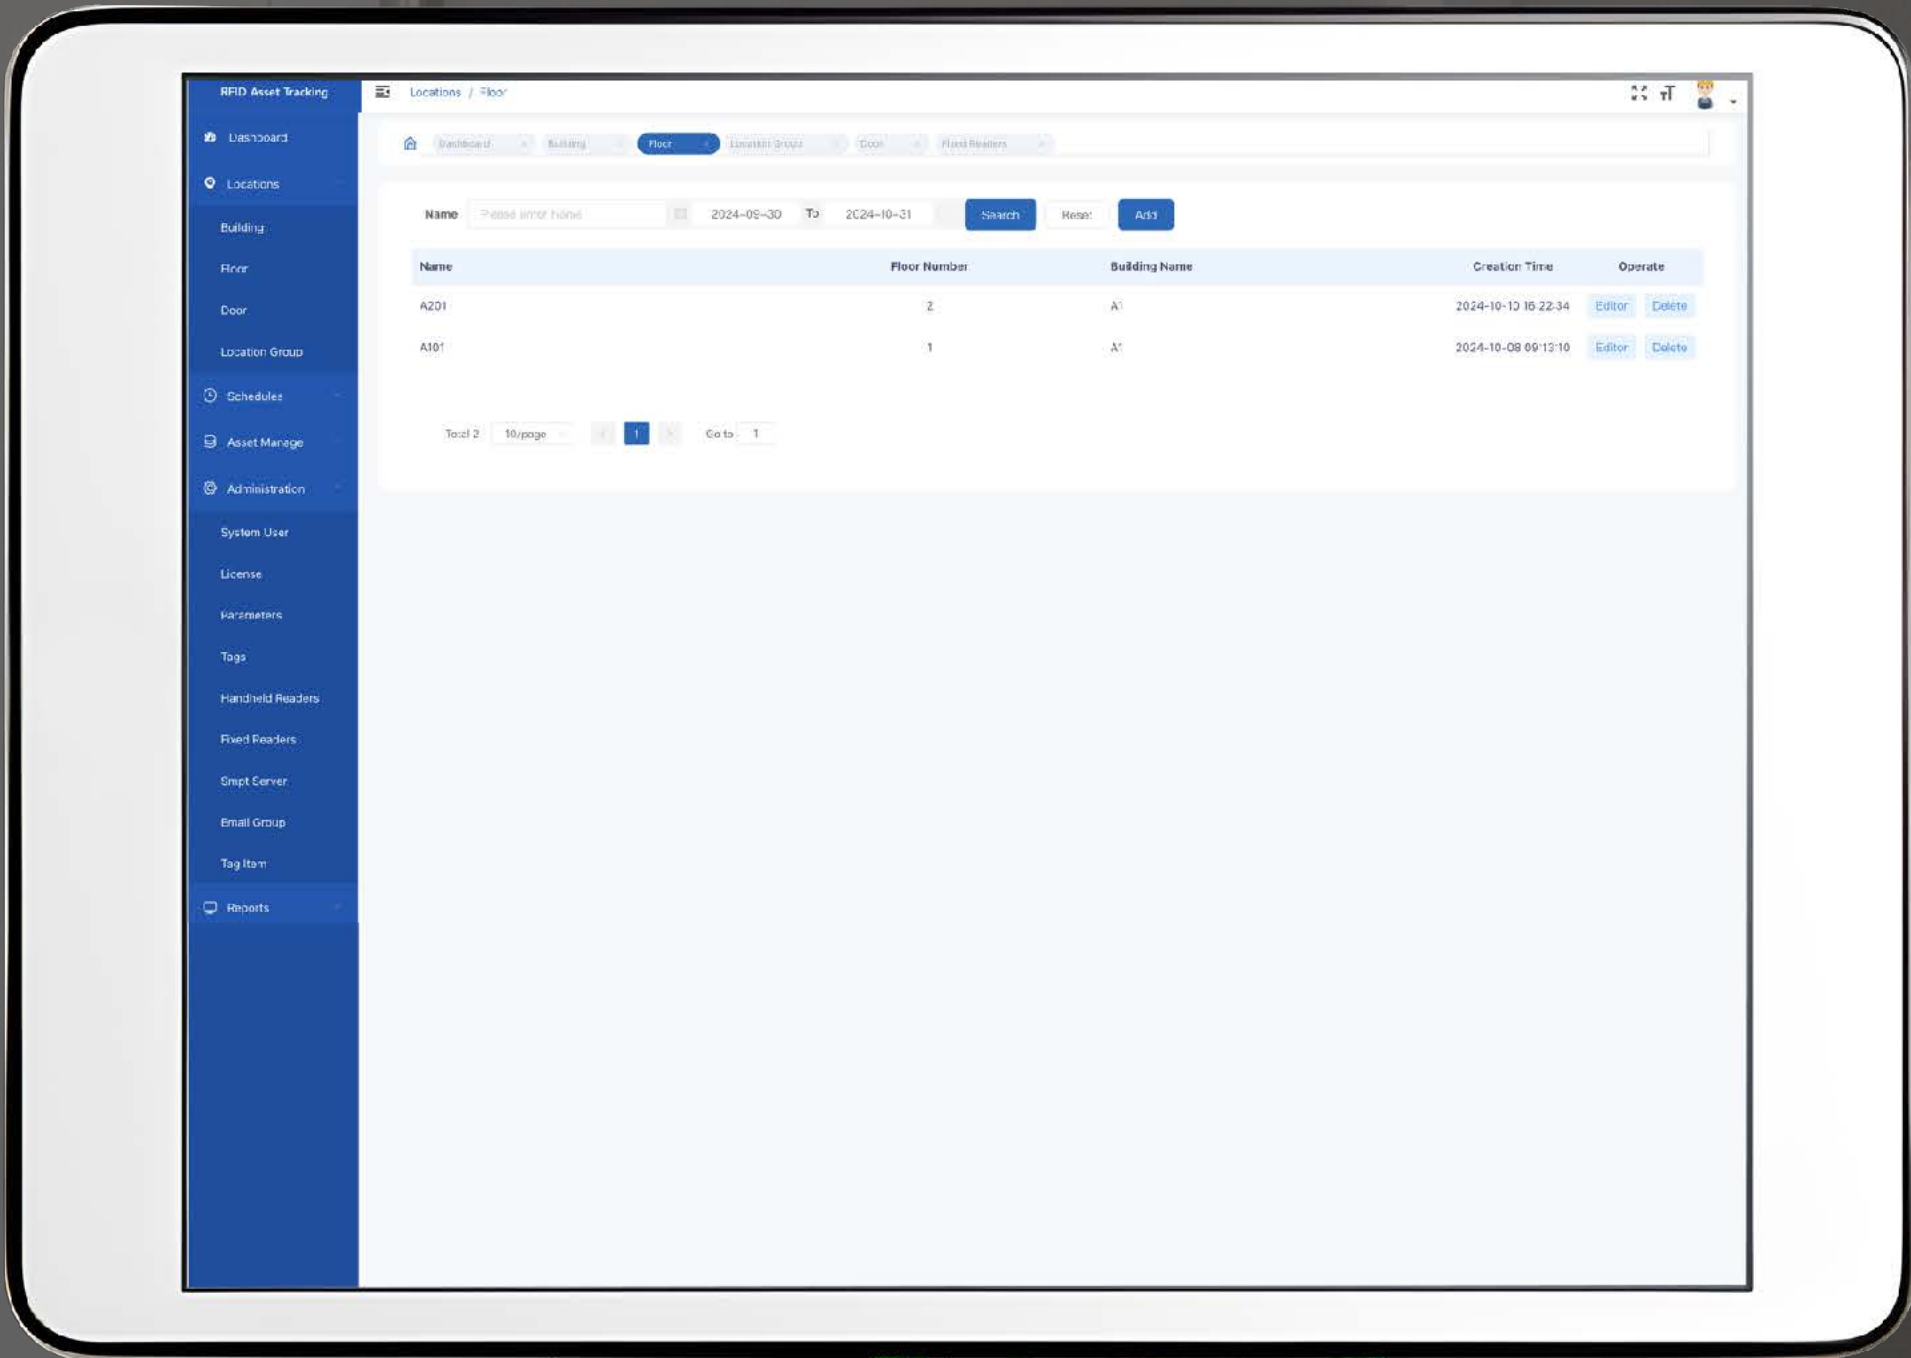

Define the location to monitor

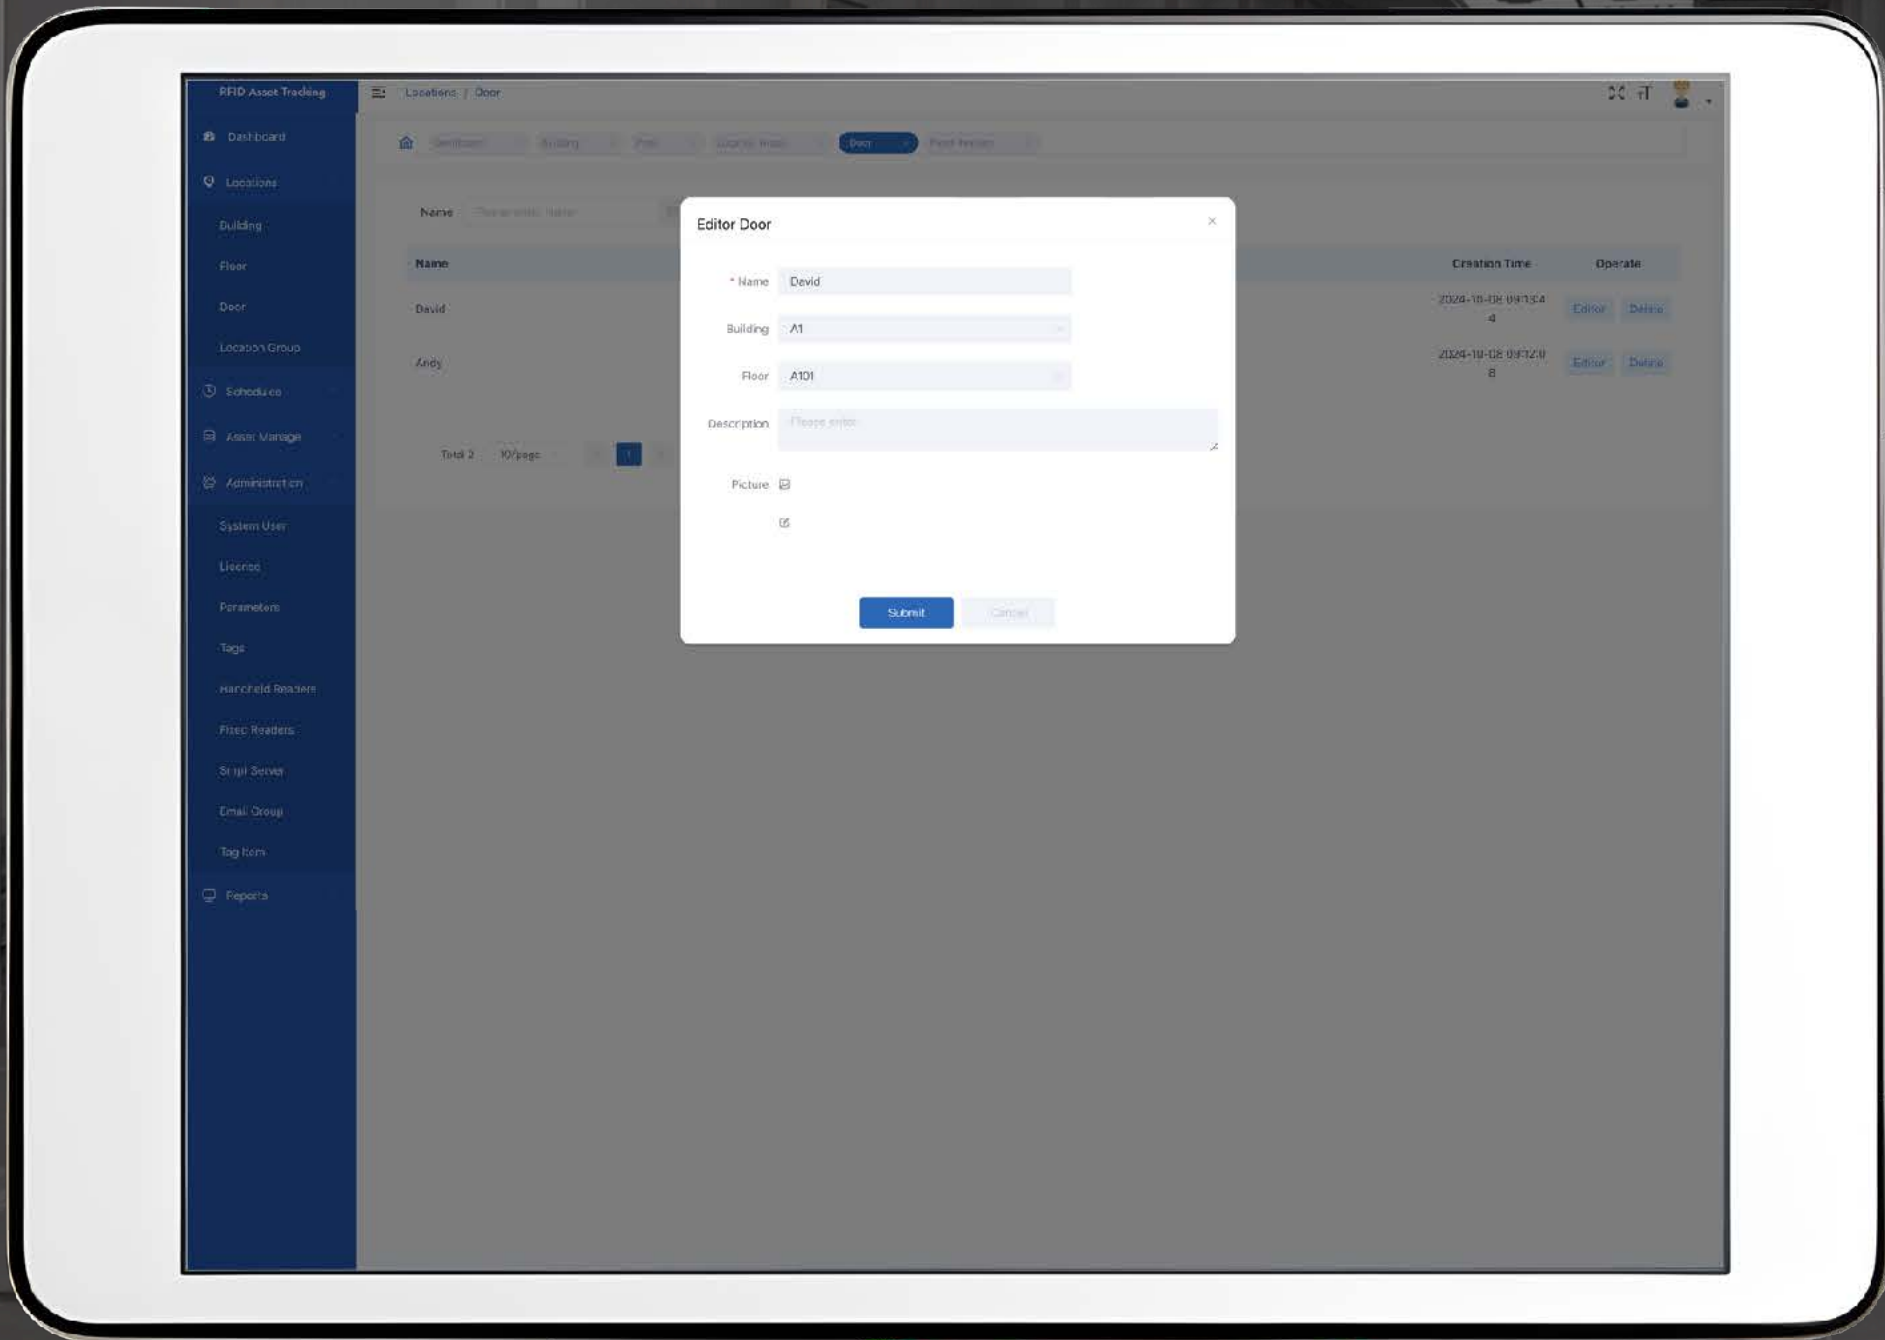

Set up multiple locations to monitor asset tracking

Flexible definition of **FLOORS & DOORS**

Flexibility to adjust the details of specific floors and doors as required, setting up different areas where assets can be tracked.

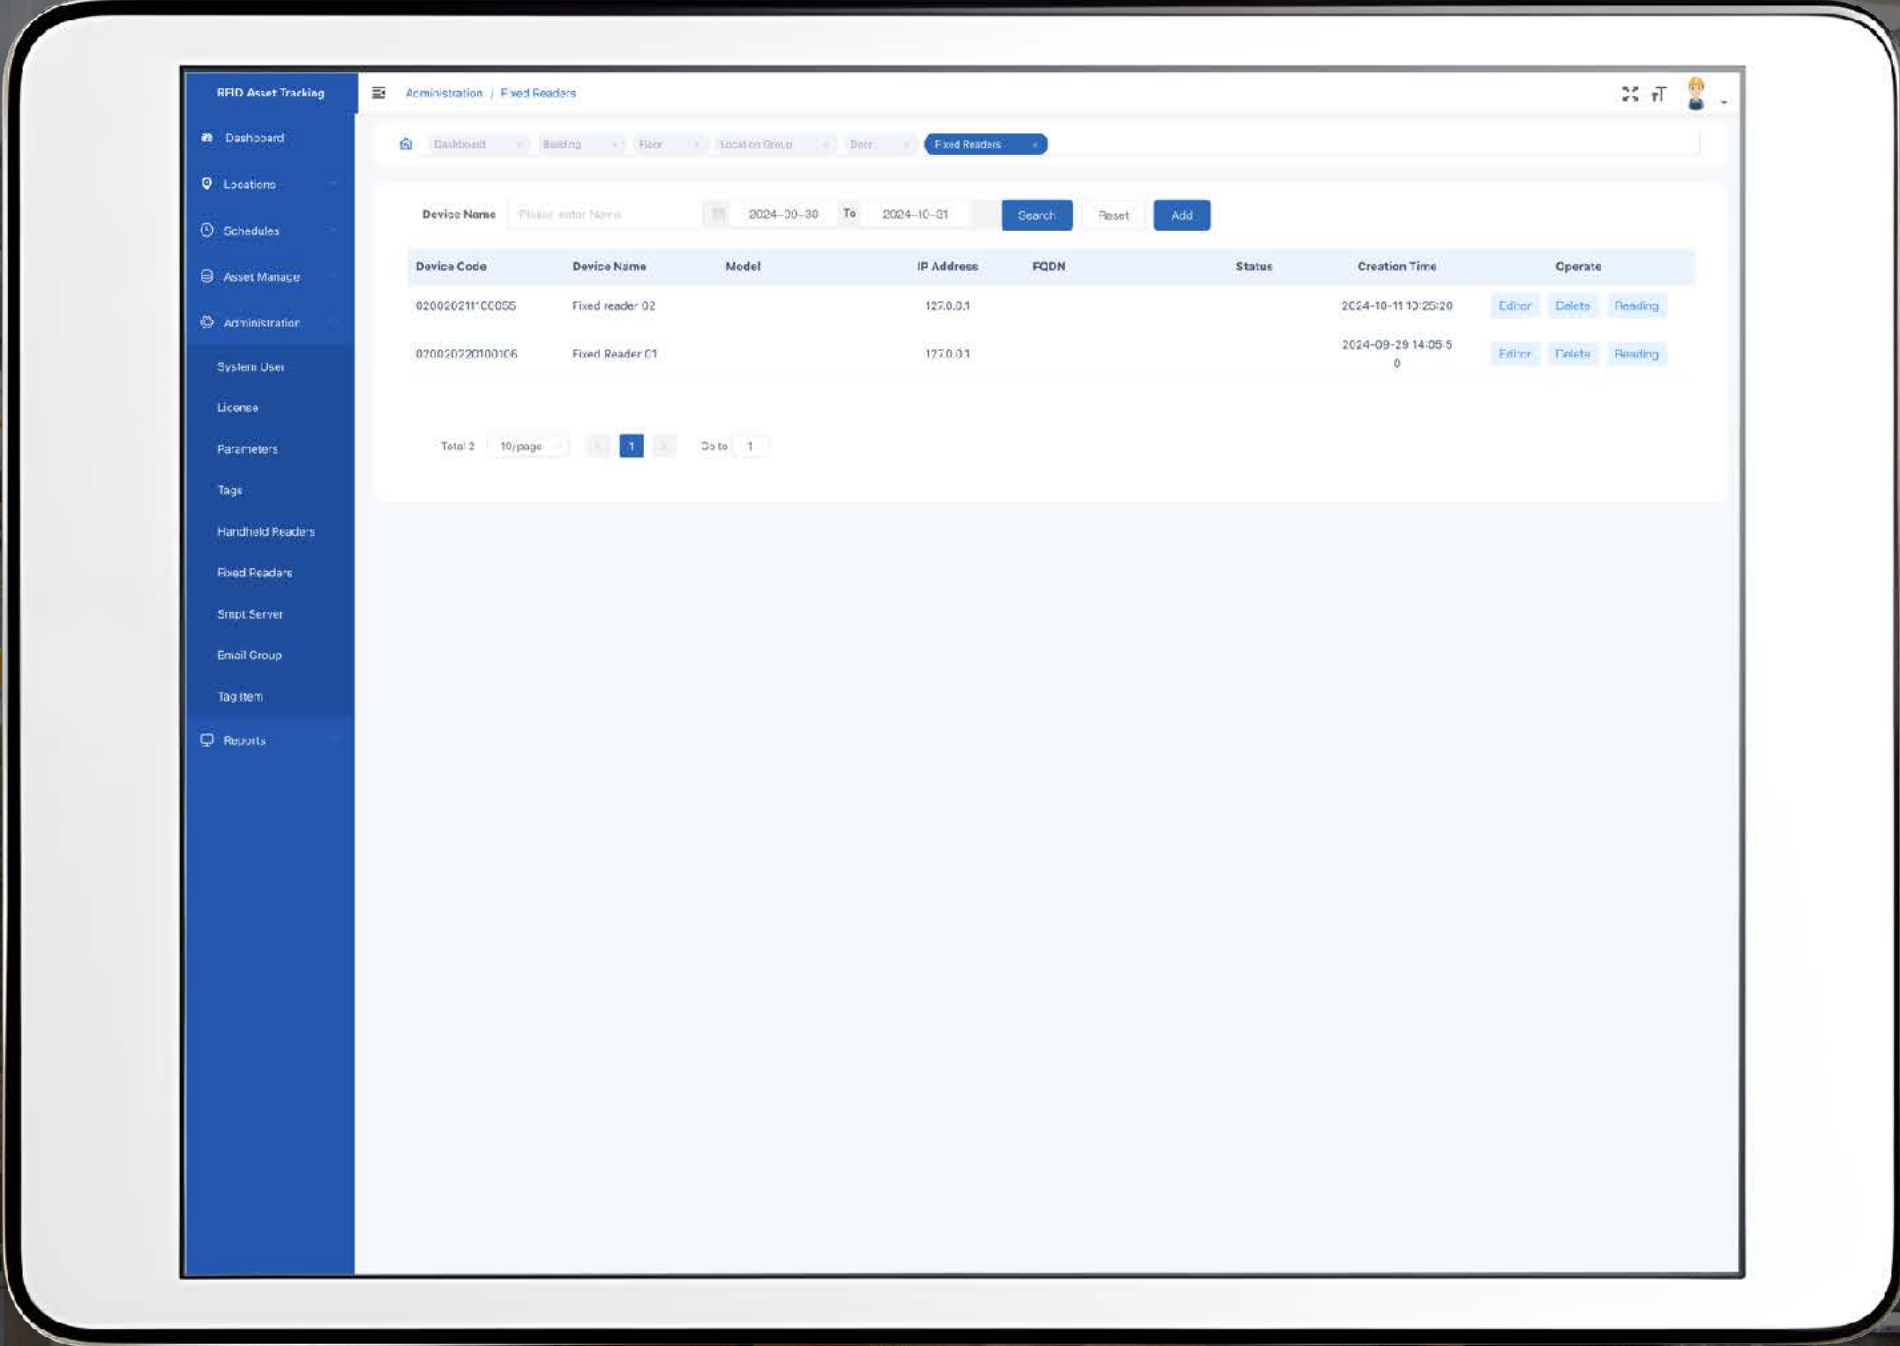

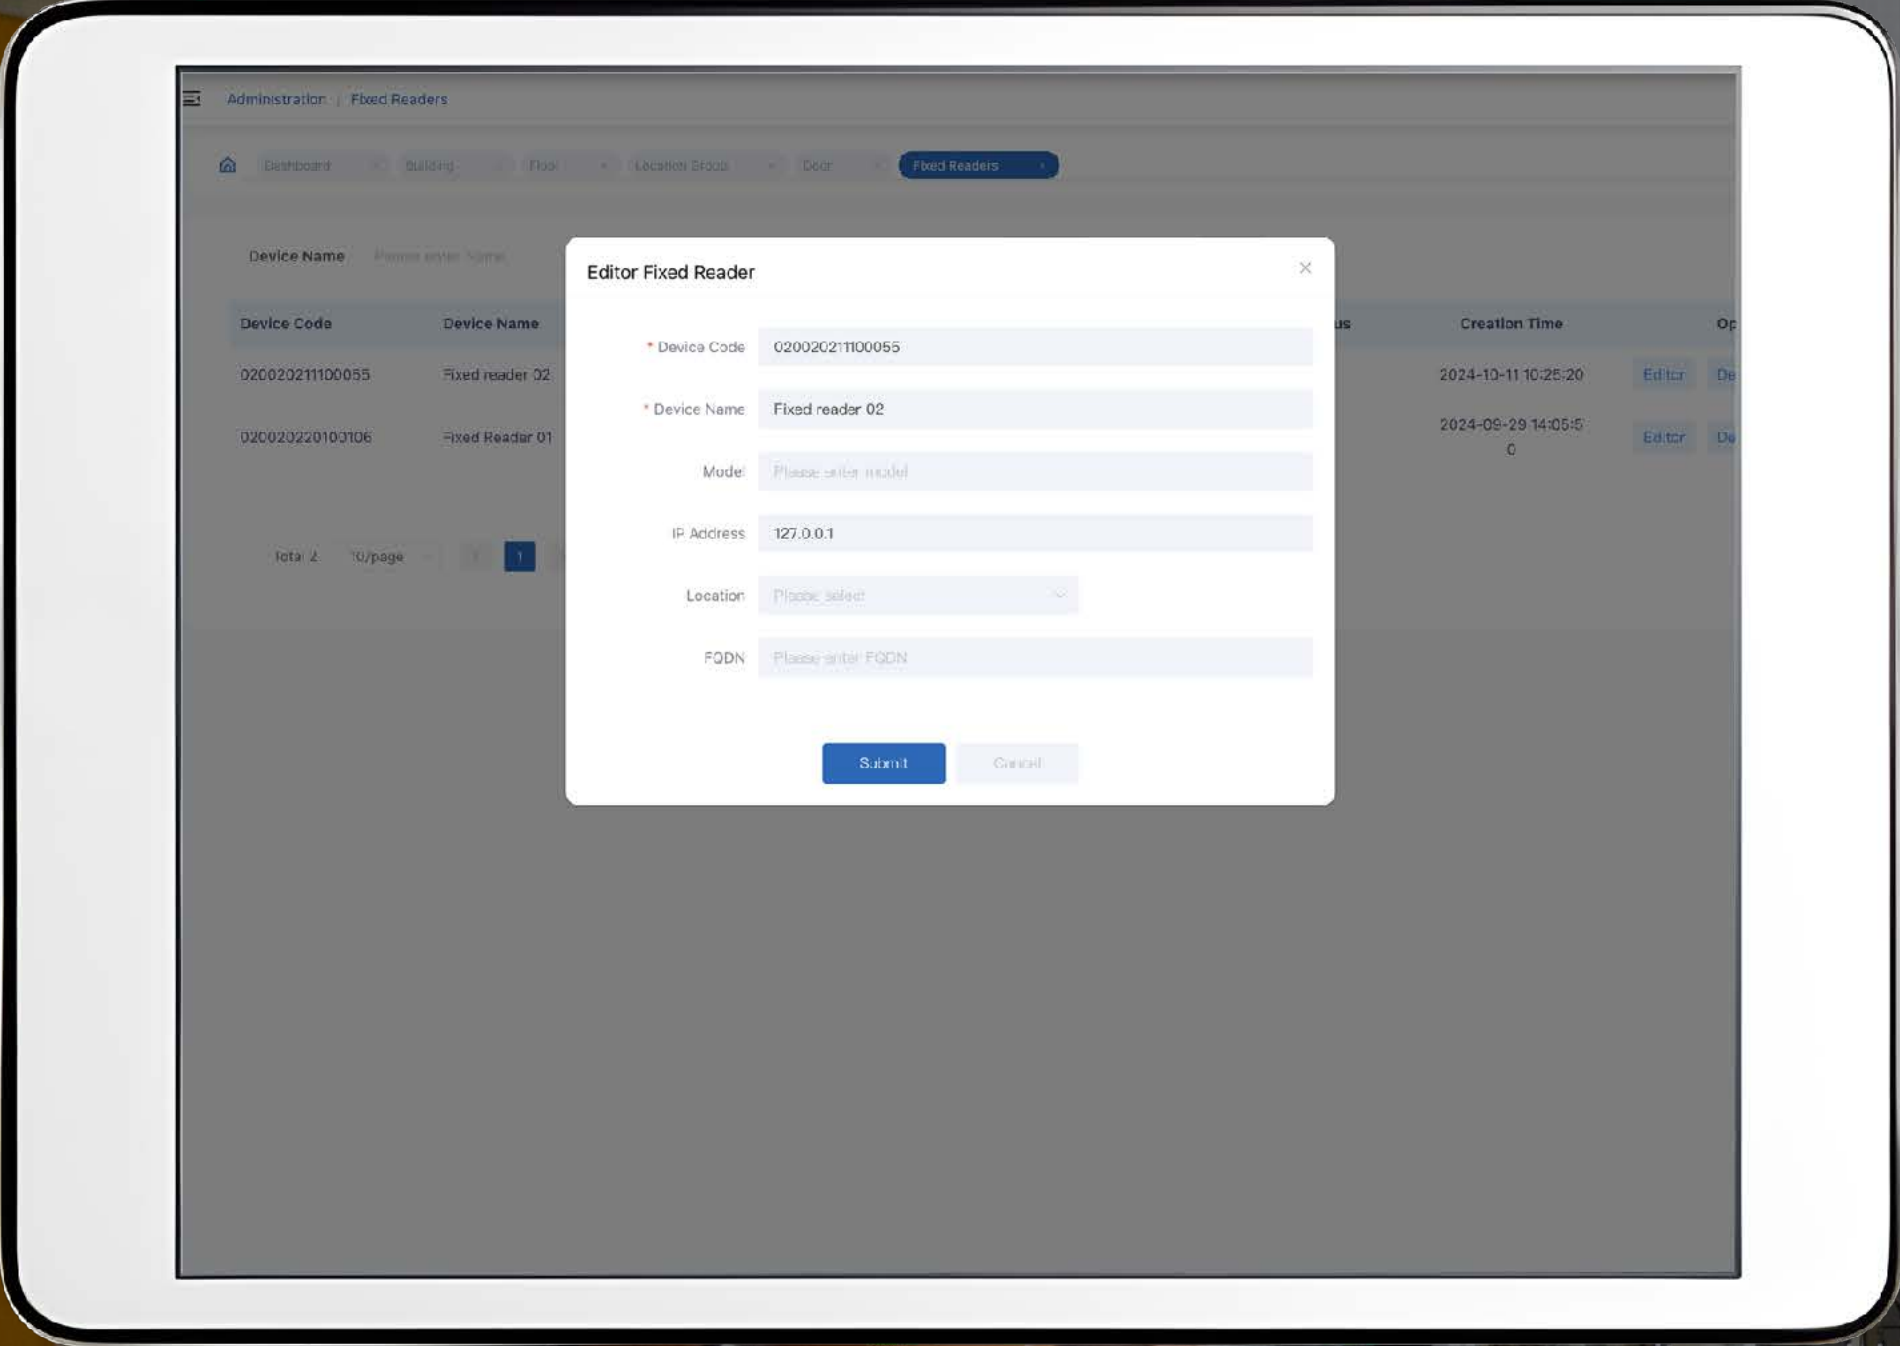

Specify floors within buildings

Identify doors to monitor for every floor

Assign tracking tags to **ASSETS**

Assign RFID identification tags to each item and start tracking assets easily.
Organize them into asset groups, then tag their locations to begin detailed tracking.

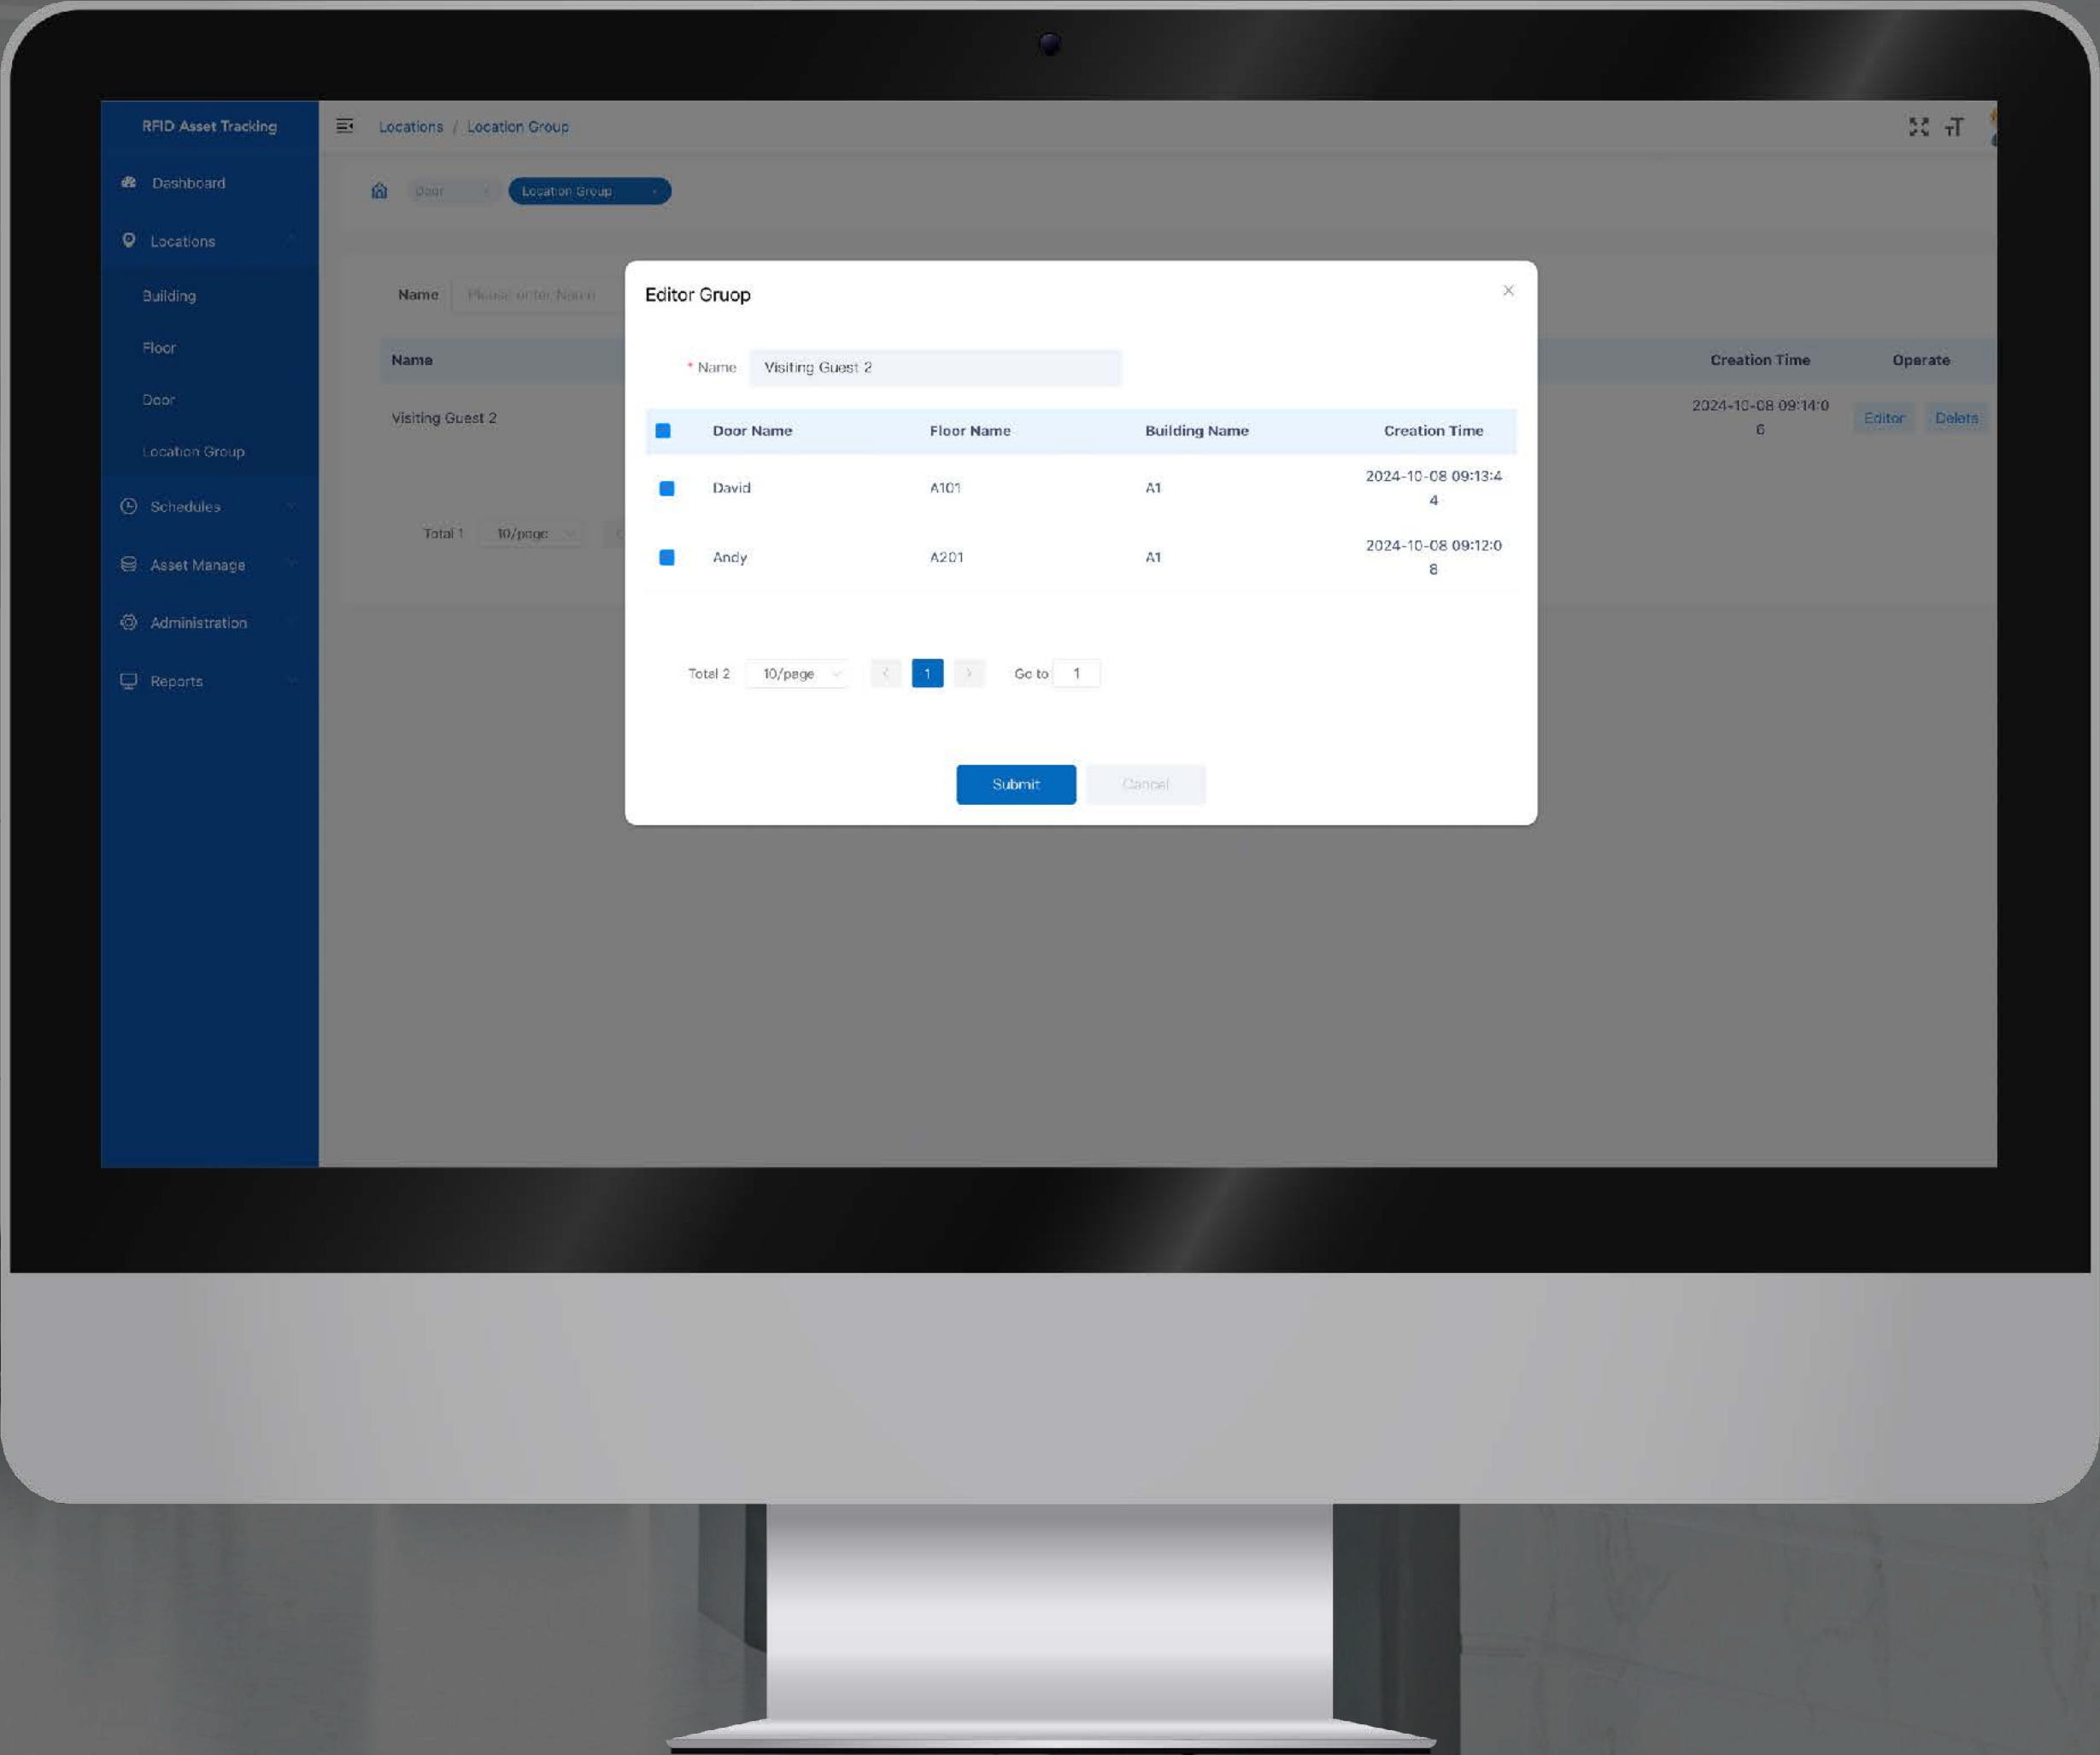

Assign tracking RFID tags to each asset

Identify asset locations to start tracking and monitoring

Quickly monitor and locate **VALUABLE ASSETS**

Categorizing each asset into groups ensures that each resource is utilized efficiently.

Transform into different segmented asset management areas through different hardware configurations

You can access it from **ANYWHERE ANYTIME**

Our RFID Cloud software is entirely web-based.

This means that as long as you have an Internet connection, you can connect into our user dashboard from any device, anywhere.
